The Conference

The Workshops in Algebraic Theory of Singularities have been organized since 2002 at the Universidade Federal Fluminense, during the months of January or February. This eighth edition will be held from 16 to 20 January 2017 and will be organized jointly with the now itinerant Workshop on Singularity, Geometry, and Differential Equations, initiated by the ICMC/USP. The event will celebrate the 70th birthday anniversary of A. Hefez and will also be dedicated to Professor Emeritus M. G. Soares.

The aim of these workshops is to gather researchers in several fields as Algebraic Geometry, Complex Dynamics, Singularity Theory, Topology and Differential Equations that work with singularities of algebraic and analytic spaces allowing the exchange of experiences and to increase their collaboration.
